Have 2 years' experience in web development as PHP programmer. Have expertise and experience in such phases of project life cycle as analysis, database creation, coding, testing and implementation phases. The projects that I have developed include standalone websites, e-commerce applications, mobile applications server sides. My major skills are in PHP (mostly with implementation of OOP and its design patterns), MySQL, MongoDB, HTML/CSS, JavaScript including Yii, Yii2, jQuery. Have experience in working with Drupal CMS. Also specialize in UI programming with jQuery UI, backbone.js, underscore.js and many other modern technologies. Experienced Linux user. Speak good English.

**Education:**

- Higher college of telecommunication, faculty of telecommunication, 2010
- BSUIR, faculty of computer technologies, 2014

**Strengths:**

- Able to willingly work both in team and individually
- Highly skilled in estimating the amount of a given task and completing it on time
- Good communication skills

**Professional Experience:**

LTD "Web-build" Belarus, Dzerzhinsk

PHP programmer, 2013 to present

**Additional info:**

As a specialist, I always try to be aware of the newest trends in the sphere of modern technologies (linuxjournal.com, statuscode.org), maintain and update my skills through reading books (latest: "Modern PHP. New Features and Good Practices" by Read Josh Lockhart, "Redis in Action" by Josiah L. Carlson).
